End Application:

C-17

Special Features:

Consist of 1 shaft alignment protractor; 1 torque measurement adapter; in a plastic carrying case; the torque measurement adapter is a .025 inch drive socket with one end designed identical to the spline of the actuator shaft; size 8.000 inch x 6.000 inch x 4.000 inch; weigh 10 pounds; material of torque measurement adapter - cres; material of shaft alignment protractor - al; finish of torq meas adptr - passivated; finish of shaft align proct - anodized; carrying case - plastic

Functional Description:

For functional testing of the fire shutoff valve; the shaft align proctr - mt baseplate and pointer on actuator assembly to verify angular rotation of actuator; torq meas adptr - mate adptr with actuator gears and attach a .025 inch drive torq wrench to measure torq output
