End Application:

B-52, f-16 external fuel tanks

Product Name:

Ac/dc fuel quantity gage capacitance test set

Special Features:

Provides means to determine serviceability of aircraft having ac or dc capacitance-type fuel gaging systems; c/o one integral unit w/transit case, dc electrical resistance measuring circuitry, ac and dc capacitance measuring circuitry, capacitance substitution circuitry (simulates tank unit and compensator capacitance), calibration circuitry with built-in standards of capacitance, switches, wiring, cable assemblies, and accessories; operates from external power source and from self-contained battery; measures tank unit and compensator capacitance (ac and dc); measures tank unit and compensator insulation resistance

Functional Description:

Tests fuel quantity measuring system

Reference Data And Literature:

F33657-88-c-0037 serd 46504; 6j14-2-39-2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23900
