End Application:

An/alq-161; 4920-01-256-1925, test program set

Test Item Connection Method:

Connector

Functional Description:

Contains circuitry, wiring, components, station interface and lru interface required to provide stimuli/measurement connections

Fsc Application Data:

B-1b aircraft age.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
