End Application:

F15 arts

Usage Design:

Switching power and circuits

Inclosure Feature:

Fully enclosed

Manual Operation Facility:

Not provided

Special Features:

Consist of (1) 5998013102915 circuit card assembly; (1) 5998013105621 circuit card assembly; (1) 5998013107470 circuit card assembly; (4) 5998013102916 circuit card assembly; (4) 5998013100178 circuit card assembly; (2) 5998013041661 electronic components assembly; (1) 5998013094184 electronic components assembly; (6) 5935011793269 electrical connector bracket; (4) 5310009282690 lock washer; (6) 5310005956761 flat washer; (4) 5305000545636 machine screw; (1) nsl identification unit plate; (1) nsl uut pwr/load cca; (1) nsl front panel cover assembly

Functional Description:

This item is embedded into the control panel test (p/n 3598366-1); it is an electronic switch within itself; capable of rerouting power and circuits

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
