End Application:

B-2/sram ii ests

Terminal Location:

Back

Power Source:

External

Mounting Method:

Bracket

Terminal Type And Quantity:

19 connector, receptacle

Special Features:

Special handling required-these parts are electrostatic discharge sensitive

Functional Description:

This power control drawer assembly extends the power in the test station; it is an interface drawer which provides electronic control of the launcher rotation, voltage, current programming and missile electronic; used to check out the electronic components in the missile; works with electrical-electronic equipment test station (4920011365146)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A31700
