End Application:

In support of the f-15 acft

Product Name:

Test set, armament circuits preload

Special Features:

Provides on a single station basis, the capability to perform preload electrical and stray voltage checks

Reference Data And Literature:

Serd no. 8656s

General Description:

C/o transit case; voltage detectors; cable assemblies; circuit selectors; adaptor plugs; 34.500 in l by 16.800 in h by 22.500 in d; 100.0 lbs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
