**End Application:**

F-16c/d aircraft age.

**Special Features:**

A rigie end item container will be reqd for protection of fixture and retenetion of pins

**Functional Description:**

Nused to install the nas 1724 bolt, tapered shank, shear type, 100 degrees head, that is used to attach the 183204-1, 183212-1, 183217-1 and 183281-1, tie bar wing side, lef rotary actuator w/installed on 16w1030 wing box assembly

**Reference Data And Literature:**

Serd no. 11850

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A505c0
