End Application:

F-16 mobile training center

Special Features:

The deflection gage is a conventional dial indicator, federal gage co. Model no. C815, mounted in a special fixture

Functional Description:

The deflection gage is used to measure the deflection when the power pole assembly is clamped together to assure the clamping pressure is adequate

Reference Data And Literature:

General dynamics serd no. 42696

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
