End Application:

B-1b acft

Special Features:

Digital instrumentation, hydraulic motor; measures ballscrew efficiency, torque values, thrust, lash, rpm and end play; also contains hydraulic load cylinders to load uuts; measures linear travel of actuators from 11.528 in. To 30.041 in.; company item name-test station, aircraft mechanical components

Functional Description:

Used to check and verify integrity of the flap/slat ballscrew and actuator assemblies

Reference Data And Literature:

Serd 14j04c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
