End Application:

C5b aircraft madars ii system

Functional Classification:

Aa-9.4

Special Features:

Ic/o digital multimeter w/ohms con vt, current convt, ieee interface, true rms ac; function generator w/hv output; universal counter; digitizing oscilloscope; quad output power supply; power supply; ac power source; electronic load system; 40mb disc with floppy; 81 mb hard disc; cartridge tape drive; printer, 200cps; switching unit; switch extender; uut interface adapter; bit pattern generator; relay module, 32 channel; coaxial matrix; rf multiplexer, 75 ohm; digital i/o card; power actuator, 8 channel; general purpose relay, 16 channel; digital-to-analog converter; power: 3-phase, 1500 va, 0.0-135.0 vrms per phase, 0.0-6.0 amps per phase, 45.0-2000.0 hz; phase angle programmable 0.0-360.0 degrees in 1.0 degree steps

Functional Description:

Used to test the malfunction, detection, analysis and recording system of the c5b acft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
