Overall Length:

12.000 inches

Overall Height:

13.500 inches

Overall Width:

14.000 inches

End Application:

F-15e

Test Item Connection Method:

Connector

Special Features:

Provide means of interfacing the uut with the station; primarily for electrical hookup, mechanical support and cooling; peculiar signal conditioning and loads shall be located in the interface equipment as required; this unit is attached to the test station; themodule is connected to the interface unit

Functional Description:

C/o one interface adapter containing the wiring; the adapter shall provide electrical and mechanical connection to the test station

Material:

Aluminum body

Reference Data And Literature:

Serd no. 8763

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
