End Application:

F110-ge-129

Special Features:

1item is a modification of nsn 4920012772016 with the retrofit kit p/n 1439m97g01; item has the capability to handle f101-ge-102, f110-ge-100, f118-ge-100 & f110-ge-129 engine components; c/o steel enclosure means for mounting, which contains pressure control valves, pressure transducers, thermocouples, downstream volume section; portable standard 19.000 inch relay rack enclosure; set of cables & pneumatic hoses; additional capability to test the anti-icing valve components of the f110-ge-129 engine

Functional Description:

For pre & post overhaul testing of the 1584m19p01 anti-icing valve; test leakage rates of assembled anti-icing valves or of sub-assemblies of anti-icing valves; test the performance characteristics of the pressure regulator portion of an anti-icing valve; determine the cause of the malfunction; test to insure operational integrity; test at full flow conditions & proof pressure testing
