Major Components:

Pcb assembly function generator 1, pcb assembly sample & hold 1, pcb assembly velocity monitor 1, pcb assembly servo amp & demod 1, pcb assembly ac power supply 1, wiring diagram 1, cable inter 1

End Application:

Fuel assembly ts; f110-ge-129

Component Quantity:

7

Criticality Code Justification:

Agav

Functional Description:

The inlet guide vane actuator test set sends signals to the actuator; it tests the response that the actuator is giving

Nuclear Hardness Critical Feature:

Hardened

Reference Data And Literature:

Serd no. 1735

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T01200
