End Application:

F100-pw-100/200/220/220e aircraft engine

Nominaldiameter:

28.000 inches

Special Features:

Company item name-ring, 6th stage

Functional Description:

Used in conjunction with pwa70346 holding fixture and various other support equipment items to support the 6th stage stator during machining of the snap diameter for plasma spray repair

Reference Data And Literature:

Serd no. 6091, serd no. 6007, t.O. 2j-f100-94

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
