End Application:

F110-ge-400 turbofan engine

Nominaldiameter:

23.000 inches

Special Features:

Finish is black oxide per ams 2485, material is steel, item is 8.000 in. Thick

Functional Description:

Used to remove or install the combustion chamber inner liner and the hpt inner forward nozzle support in a horizontal or vertical lift when used with the appropriate adapter

Unpackaged Unit Weight:

38.000 pounds

Reference Data And Literature:

Mil-s-8512d

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0

Mil-std (military Standard):

Mil-s-8512 spec.
