End Application:

F-15 aircraft radar test station

Functional Description:

Used to cool radar transmitter during bench testing

General Description:

Ic/o refrigerant tubes 25; compressor 1; condenser unit 1; heat exchanger 1; connector, half union 2; valve, expansion 1; valve, control, head pressure 1; valve, bypass, hot gas 1; misc couplings and hardware

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
