End Application:

F110-ge-129 engine age.

Test Item Connection Method:

Cable

Special Features:

C/o mtg brackets, cable

Functional Description:

Provides capability to administer vibration/environmental stresses to f110-ge-129 digital electronic control (dec) at depot facility

Reference Data And Literature:

Tech order=33d4-6-749-1; operation and maintenance instruction--de testing and reprogramming syste (dtrs) b-1; serd 1815

Special Test Features:

Cable must withstand temperatures of minus 54 degrees c to 69 degrees c during environmental testing of the dec

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
