End Application:

F100-pw-100/200/220

Nominallength:

2.688 inches

Nominaldiameter:

2.000 inches

Special Features:

Four of these locating plugs are positioned in holes on the balance plate on a controlled diameter to locate a snap diameter on a 13th stage spacer compressor. These pluges are used with pwa55175 support on balance plate

Functional Description:

Plugs used to balance the 13th stage compressor rotor spacer using pwa51677 balance plate and pwa55175 supports

Reference Data And Literature:

Serd 6395

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
