End Application:

B-1b aircraft support equipment

Usage Design:

Aircraft hydraulic system

Installation Design:

Portable

Voltage In Volts:

115.0

Phase:

Single

Frequency In Hertz:

60.0

Functional Description:

Automatically controls plotting of the static characteristics of electrohydraulic servovalves; also applicable for final assembly adjustment and trimming measurements during overhaul

Reference Data And Literature:

T.O. 33d7-23-18-1

Supplementary Features:

Is a self-contained, free standing unit mtd on four casters

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T361-e
