**End Application:**

C-17 aircraft age.

**Special Features:**

Unit is appx 32 ft long, 8 ft wide; unit consist of a vacuum pump rated at least 1500scfm, an 8 foot by 15 foot ullage tank (appx 180 cu. Ft.) with two 8-inch diameter holes with flanges on each end, two 8-inch flange gate valves (one for system shut off valve and one for flow control), a 0-9000 scfm venturi, and a 0-100 in/h20 differential pressure gage. After the flow control gate valve and before the venture the 8-inch pipe is 40 inches long. After the venturi, ending with a 500 round rated flange fitting, the 8 inch pipe is 64 inches long. The entire test unit is mounted on a platform

**Functional Description:**

Used to provide simulated atmospheric conditions totest the climb and dive vent valves under operational conditions

**Reference Data And Literature:**

Serd no. 460162

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23800
