End Application:

Rf-4c aircraft electro-Optical long range oblique photography system (elorops)

Nominallength:

33.000 inches

Nominalwidth:

12.400 inches

Nominalheight:

11.200 inches

Functional Classification:

Gg-7.4

Special Features:

Consist of a weldment fixture fabricated of two extruded aluminum channels welded together; supports welded to the outer ends of the channels; tapered pins; three straight pins; that stabilize the azimuth alignment fixture when it is installed on the aircraft; a boresight mirror assembly

Functional Description:

Provides a means for establishing the baseline references required for azimuth alignment of the imaging sensor in the azimuth axis during the boresight procedure

Reference Data And Literature:

Serd 0006

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
