Ac Voltage Rating:

115.0 volts

Frequency Rating:

Between 60.0 hertz and 400.0 hertz

Joint Electronics Type Designation System Item Name:

Test set, electronic system

Joint Electronics Type Designation System Item Type Number:

An/alm-186b

Electrical Power Source Relationship:

Alternate operating

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Power

Functional Description:

Receives power from facility utility sources, conditions it, distributes it to other test set subsystems. Most significantly, radio frequency test cart (rftc) la0011-1; and an/alm-188 maintenance test bench. Test signals are provided to an/alq-131 pod by pod control and monitor assembly and synthesizer sweeper and test operations are controlled by electronic station test console (estc) lm0012-1; computer test measurements are taken by oscilloscopes and spectrum and scalar analyzers multifunction unit and noise figure test set. The radiation monitor scans environmental for microwave radiation leaks from an/alq-131

Fsc Application Data:

5865-01-104-1671

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
