End Application:

F100-pw-220/229 aircraft engine

Functional Classification:

Gg-7.4

Special Features:

Mfg name fixture, locating; material, aluminum; size 0.720 in. Wd; 0.750 in. Ht; 2.000 lg; 4.000 lb wt approximately

Functional Description:

Used to locate part z29 in proper position on aircraft board during assembly; can also be used to inspect 0.600 in. Dimension from the side of the board to the side of z29

Reference Data And Literature:

T.O. 2j-f100-94; serd no. 6156

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
