End Application:

Test stand aircraft eng. 4920013258120

Functional Classification:

Aa-12.11

Special Features:

The flow linearizer operates from 20-40 vdc or ac and provides 5 vdc output to power the flow turbine electronics; turbine input and signal output are 0-5 v levels; the unit is housed in a box measuring 4.075 in. X 3.075 in. X 2.025 in.

Functional Description:

The flow linearizer is an item that connects between a flow turbine and a counter/display unit and translates the non-linear flow-frequency characteristics of the flow turbine into a linear flow frequency output

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
