End Application:

F-16c/d, korea, (blk 50 c/d) t/v: zpd (ecp 2001)

Special Features:

C/o combination case, two each voltage detectors, stored in the combination case, peculiar adapters stored in the case

Functional Description:

To perform preload tests of the stores management system; tests consist of absence of stray voltage and system confidence tests at the rack breeches and weapon disconnects

Reference Data And Literature:

Serd no. 7506 (t)

Special Test Features:

Vthe adapters connect the voltage detector to a rack breech, launcher firing circuits, fuel tank pylon breech, weapon umbilical; voltage detector will indicate the presence of release/firing voltage to verify release system operation

Supplementary Features:

Also known as test set - preload armament circuits (ecp 2001)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23800
