End Application:

Multi-application on all laser/flir system; f-111f and rf-4c acft

Special Features:

Portable, eye safe, automatic self test; simplified calibration and built-in range calibration; reconfigured for multi-weapon applications; test measurement digital readout; laser to flir boresight; wide field of view to narrow field of view for line of sight; receiver sensitivity; dead and noisy channels; auto tracking

Functional Description:

The laser and flir test set is used to verify electro optical system operation without requiring downloading of the system. This system has two assemblies: the weapon test module (wtm) and a test controller; common in hardware configuration for all system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
