End Application:

F-15a/b/c/ (msip) f-15e

Container Type:

Case

Functional Classification:

Aa-9.3

Special Features:

This test set has an extensive self-test capability via internal functional checks along with continuity and insulation resistance testing of the test sets system test cable assemblies to verify its operational readiness. The test set is connected to the applicable receptacles, breeches, and disconnects of the lru under test and to a shoppower receptacle. The appropriate test is then selected on the remote display unit the test set sequences through the programmed test routine and provides a "go" or "no-go" status indication of the test resulte

Functional Description:

The test set is used in the armament shop to perform electrical functional and fault isolation testing of the suu-59 inboard and suu-60/73 centerline pylons: adu-407/552/578 adapters: lau-88, lau-106, lau-114, lau-117, and lau-128 launchers: mau-12, bru-46, and bru-47 bombracks; the electronic sequencing unit, power supply and encoder/decoder, and suu-20 bomb dispenser. The test set consists of a combination case and fou (4) transit cases which contain the interface cables to interface the f-15a/b/c/d(msip) air-to-air and air-to-ground weapon delivery sys. Lrus and the f-15e air-to-air and air-to-ground weapon delivery sys lrus
