Overall Depth:

16.000 inches

Overall Height:

12.000 inches

Overall Width:

14.000 inches

End Application:

Aircraft models f/a-18a/b/c/d

Coupling Method:

Electronic

Special Features:

Electrical bench input/output drawer is controlled via q-bus interface and provides the eots signal measurement and stimuli generation capability and electrical bench to optical bench interface; components include change of state input register, camac controller, digital to analog module, three (3) discrete output modules, three (3) discrete input modules, six (6) reed relay out modules; provides +50vdc, +28vdc, 2 +15vdc, 2 -15vdc, +5vdc, and -5vdc power, each reed relay output mods provides 24 reed relay output channels for signal amplitudes of 100 v and 0.5 amps; equipment in the electrical bench includes touch screen drawer, gain-phase analyzer, digital multimeter, digitizing oscilloscope, video monitor, ruggedized microvax computer, printer drawer, rotary stage controlle r drawer, power distribution drawer, interconnecting device recept drawer, electrical bench blower

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T389-c
