Mounting Type:

Bench

End Application:

C-17 aircraft age

Functional Classification:

Aa-8.4

Special Features:

5ft w, 2.5ft h, 1ft thk

Functional Description:

Test stand used with various support equipment for testing oxygen regulator, includes following equipment, lockup pressure test fixture p/n 89t24 (serd470053), reducer test fixture p/n 411187(serd470054), restricter assemblies test fixture p/n 89t385(serd470056), seat and poppet test fixture p/n 89t440(serd470057)

Entry Date:

98-08-31

Reference Data And Literature:

470075, contract no. F33657-81-c-2108, t.O. 33d2-10-72-1

Supplementary Features:

Media gaseous oxygen, inlet operating 200 to 430psig, operating temperatures -40degf to 160degf, relief valve setting 125psig +or- 5psig, altitude range sea level to 50, 000ft, inlet port per and10050-6, outlet fitting per ms3365e12, lectrical requirements 28vdc normal 18vdc emergency

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
