End Application:

C-17 acft

Special Features:

The accumulator-ramp emergency egress is a piston type, air-to-oil accumulator.(nitrogen gas under pressure is used to pressurize the hydraulic fluid).Must be mounted in a vertical position to allow any accumulated fluid leakage to drain out in the gas port before testing for piston leakage.

Functional Description:

Holds accumulator-ramp emergency egress, p/n: 0860174 in a vertical position for functional testing
