Overall Length:

4.667 feet

Overall Height:

2.750 feet

Overall Width:

3.500 feet

Assembly Form:

Rigid

End Application:

C-17 aircraft

Work Holding Device Position Adjustability:

Nonadjustable

Functional Classification:

Gg-7.2

Special Features:

Consist of a welded steel, rectangular, structure; four mounting pads; four swivel casters; transporting handle; floor lock; clamping hardware

Functional Description:

Used for assembly/disassembly and support of the low pressure compressor, front end down position

Reference Data And Literature:

Serd 0530

Fsc Application Data:

F117-pw-100 engine

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T361-c
