End Application:

F108-cf-100 engine; kc-135r tank-er

Special Features:

Serd name: tester, pmc system; this item along with p/n 856a1278g03 supercede nsn's 4920012511728 & 4920011874046

Functional Description:

Used for troubleshooting procedure to verify component integrity to de-terminine if replacement of the power management control (pmc) or a related component is required; will preform two static resistance tests and one dynamic test

Reference Data And Literature:

Serd no. Cfc3732

General Description:

C/o two cases containing: 1) tester case; digital volt/ohm meter w/temperature probe, rotary switches (4), cable connectors (3); 2) cable case; main test cable, mec cable, n1 sensor cable, t12 sensor cable, n2 control alternator cable, pmc j5 cable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
