Functional Classification:

Gg-7.4

Special Features:

C/o an aluminum base plate, a welded steel reflector, a tubular electric resistance element, an electrical connector, and a thermocouple probe; 16.00 in. L, 14.5 in. W, 13.00 in. H; 25 lbs

Functional Description:

Used to expand the front flange inner diameter of the high pressure compressor and sixth stage hub during assembly

Reference Data And Literature:

Serd no. 1367

Fsc Application Data:

F117-pw-100 engine ground support equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T276-d
