End Application:

C-17 aircraft

Test Type For Which Designed:

Selector panel; controller

Special Features:

Test requirements stimuli: dc voltage 5 vdc, 3 a max; 10 vdc, 0.5a; 15vdc, 1.5a; 28 vdc, 3.0z; 30 vdc; ac voltage: 115 vac, 400 hz; measurement: dc voltage 0 to 28v; ac voltage 115vac, 400 hz; serial data provision for receiving/transmitting altitude data; cable length approx. 6 ft

Functional Description:

Ato test & fault isolate the cabinpressure selector panel & provide for complete end-to-end checkout & test ofthe controller, which includes real-time simulation of the motor/valve during flight

Reference Data And Literature:

Serd no. 410609

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
