End Application:

F117-pw-100 engine assembly

Special Features:

Serd name template, marking - hp (high pressure compressor) 14th stage stator vane, te (trailing edge)

Functional Description:

Template is required to establish the various trailing edge sections on the 14th stage vanes on the 13th and 14th stage stator segments

Reference Data And Literature:

Serd no. 1227

General Description:

Template is a pie shaped piece of aluminum with a steel bolted arc segment; it features locating pins for radial and angular positioning, and lettering inscribed at different radial positions for vane section identification. An oval shaped cut-out provides for hand positioning of the tool when it is being used
