End Application:

B-1b aircraft age.

Special Features:

Rf interface assembly; c/o power divider 3; low noise amplifier 2; flexible cables 29; microwave mixer; ckt card assembly, switch

Functional Description:

Provides rf test signals used to test the das. This function receives rf test stimulus, and transmits rf threats to das under test at proper frequency and power level. This function also receives rf transmitted by das in response to rf threat that was received. This function has 3 main functional groups; rf interface assembly, amplifiers section, and antennas section

Fsc Application Data:

4920-01-345-2122

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
