End Application:

F100-pw-100/200/220/220e/229

Nominal length:

24.000 inches

Nominal width:

9.000 inches

Nominal height:

6.000 inches

Special Features:

Company item name-fixture, drill

Functional Description:

Used to secure the convergent nozzle segment, hinge cover plates and hinge details during part repair

Reference Data And Literature:

Serd 7104; t.O.2j-f100-94; t.O. 2j-f100-13-10

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
