End Application:

F117-pw-100 aircraft engine

Nominal length:

45.000 inches

Nominal width:

45.000 inches

Nominal height:

42.000 inches

Functional Description:

Locates and supports the combustion chamber for inspection and repair

Unpackaged Unit Weight:

960.000 pounds

Reference Data And Literature:

Serd no. 0145

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
