End Application:

Tf117-pw-100

Nominal length:

3.500 inches

Nominal width:

1.500 inches

Nominal height:

1.500 inches

Special Features:

3the blade length measuring system for the 11th stage compressor blades requires a blade or a blade master to be held in a rigid position to obtain repeated accuracy. Due to the accuracy required, a rigid clamping device is needed on the "z" plane

Functional Description:

This fixture is used with a master and a base to measure the hpc blade length (11th stage)

Reference Data And Literature:

Serd no.1263
