End Application:

F117-pw-100 aircraft engine

Nominaldiameter:

23.000 inches

Special Features:

Aluminum 6061-t6 and neoprene; bonded construction

Functional Description:

Used to assemble and disassemble no. 1 bearing outer race

Reference Data And Literature:

Pw drawing no. 81380

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
