End Application:

F117-pw-100 aircraft engine

Special Features:

Aluminum 6061-t6 and neoprene; welded and bonded construction

Functional Description:

Used to pressure test front seal assembly, no. 4 bearing in the differential case

Reference Data And Literature:

Pw drawing no. 80872

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
