End Application:

F-15 molecular sieve oxygen generating system

Functional Classification:

Gg-7.4

Special Features:

Consists of a valve mounting adapter; over center clamp which secures the valve in place and provides a pneumatic seal; input/output ports which adapt to the inlet valve test stand supply line and manifold; approx. 6.000 in. Lg.; 2.500 in. W.; 6.00 in. H.; wt. 5 lbs.; material steel and aluminum

Functional Description:

Used to perform leak test on the positive pressure breathing (pgb) regulator pressure modulating valve assembly during reassembly

Reference Data And Literature:

Serd 5172

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
