**End Application:**

F117-pw-100

**Specific Usage Design:**

Enables front blade retaining plate to be installed into and removed from the first stage turbine disk

**Nominalheight:**

6.500 inches

**Nominaldiameter:**

20.900 inches

**Functional Description:**

Fixture, rotating-high pressure turbine 1st stage front blade retaining plate required for assembling and disassembling the first stage turbine disk front blade retaining plate

**Reference Data And Literature:**

Serd 0128

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A505c0
