**End Application:**

C-17 acft

**Inclosure Feature:**

Multiple item w/housing

**Test Type For Which Designed:**

Load and current testing

**Special Features:**

Consists of test set and necessary cables and ciruity to select self test, heater test or testing of each rvdt

**Functional Description:**

Shall be able to test the output ac voltag (rms) of each rvdt, the heater, and self test solenoids during acceptance testing and troubleshooting ofthe angle of attack transmitters.Also provide the proper load for the rvdt's and be able to measure ac current of 3 ampere

**Reference Data And Literature:**

Serd no.550519

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T228-a
