End Application:

F-117-pw-100 aircraft engine

Nominalheight:

36.000 inches

Nominaldiameter:

36.000 inches

Special Features:

Loading-low pressure turbine running position low pressure turbine shaft to high pressure turbine case

Functional Description:

Required to apply a load rearward to the low pressure turbine shaft

Reference Data And Literature:

Pw serd no. 0373

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
