End Application:

F117-pw-100 aircraft engine

Nominal length:

80.000 inches

Nominal width:

15.000 inches

Nominal height:

68.000 inches

Special Features:

Handling-lpt and tec group

Functional Description:

Used to handle low pressure turbine and turbine exhaust case as a group during engine assembly/disassembly

Reference Data And Literature:

Pw serd no.0368

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
