End Application:

F117-pw-100

Nominallength:

16.800 inches

Nominaldiameter:

16.000 inches

Functional Description:

Required during disassembly operations of the low pressure turbine for removal of low pressure turbine disk and blade assemblies

Reference Data And Literature:

Pw serd no.0446

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
