**End Application:**

C-17

**Inclosure Feature:**

Multiple item w/housing

**Test Type For Which Designed:**

Output level of dimmer units

**Special Features:**

1consists of dimmer loads, controlswitches, control potentiometer, connections for test equip., cables to connect to various dimmers as well as to the ac or dc power supply; a cooling fan will be required to protect the loads from overheating

**Functional Description:**

Functionally test and fault isolate 49 single channel dimmer units

**Reference Data And Literature:**

Serd 440538

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T228-a
