End Application:

Angle of attack transmitter p/n 25681-13

Special Features:

Used with test set 17g550519-1, multimeter 6625011960014, function generator 6625010284989, voltmeter 6625012238240 during phase/scale error test

Functional Description:

Provide means of high precision mechanical positioning of the angle of attack transmitters vane during troubleshooting, calibration and/or acceptance testing of aoat

Reference Data And Literature:

Serd550006

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
