End Application:

F117-pw-100

Nominallength:

7.500 inches

Nominalheight:

9.000 inches

Special Features:

Tool is required to dead load test the front balance fixture for structure integrity at inspection intervals

Functional Description:

Used to balance front, low pressure turbine

Reference Data And Literature:

Serd no. 1747

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
